Who we are

Big Interview is an online system that combines training AND practice to help improve interview skills and build confidence.

Big Interview was created with top interview coach Pamela Skillings and the curriculum is based on the proven training techniques that have worked to help Pamela's hundreds of one-on-one clients land their dream jobs.

For the last 14 years, Pamela has worked on a daily basis with job seeker clients ranging from college students to surgeons to CEOs. She also works closely with hiring managers as a trainer and consultant, which allows her a deep understanding of the interview and hiring processes from both sides of the table.

She has prepared clients to ace interviews at the world's top companies and institutions - including Amazon, Deloitte, Conde Nast, Goldman Sachs, Google, HBO, JP Morgan Chase, the United Nations, and many more.

She is also a certified career coach and an adjunct professor at New York University, where she teaches in the graduate and continuing education programs for human resources professionals and career coaches and counselors.

Our Mission

The vision for Big Interview grew from Pamela's desire to help a wider audience of job seekers. The mission is to provide a best-in-class, self-guided interview coaching experience (based on proven best practices and interactive skill building tools).

Pamela Skillings

Chief Coach & Co-founder Big Interview

The Big Interview Advantage

Big Interview is the top interview training platform in the U.S. It's used by over 500 colleges, libraries and government agencies (including state labor and workforce agencies in Ohio and Pennsylvania). Although there are many educational online content providers, Big Interview has earned a reputation for leading the industry in 2 key areas:

The Best Interview Content

Big Interview offers cutting-edge interview advice that is rooted in real-world scenarios and hiring practices. Pamela Skillings' background working in HR, as a trainer, and as a coach has allowed the Big Interview team to offer detailed and practical advice not found elsewhere. In cases where industry-specific advice is required, Big Interview works with industry hiring managers and industryspecific recruiters to develop content.

Powerful A.I.-based Interview Practice Tool

Big Interview has the most advanced mock interview training tool, allowing users to practice nearly any type of job interview. Users have access to hundreds of practice sets for different experience levels, industries, job roles, and competency areas.

With AI, we can help you give students immediate feedback on how they're doing with their interview prep -- and immediate coaching on how to improve.

Big Interview Testimonials

Big Interview really supported me in preparing for MY big interview by helping me in creating a roadmap before the big day, structuring my answers and giving me real time feedback on how I was performing with the video recording feature.

On the day of the interview, I did feel more confident and performed much better than in the previous rounds. I landed that job, and I must say that Big Interview deserves part of the credit for it and I still recommend it to all my friends who are preparing for an interview!

Marta

Entry Level in Human Resources

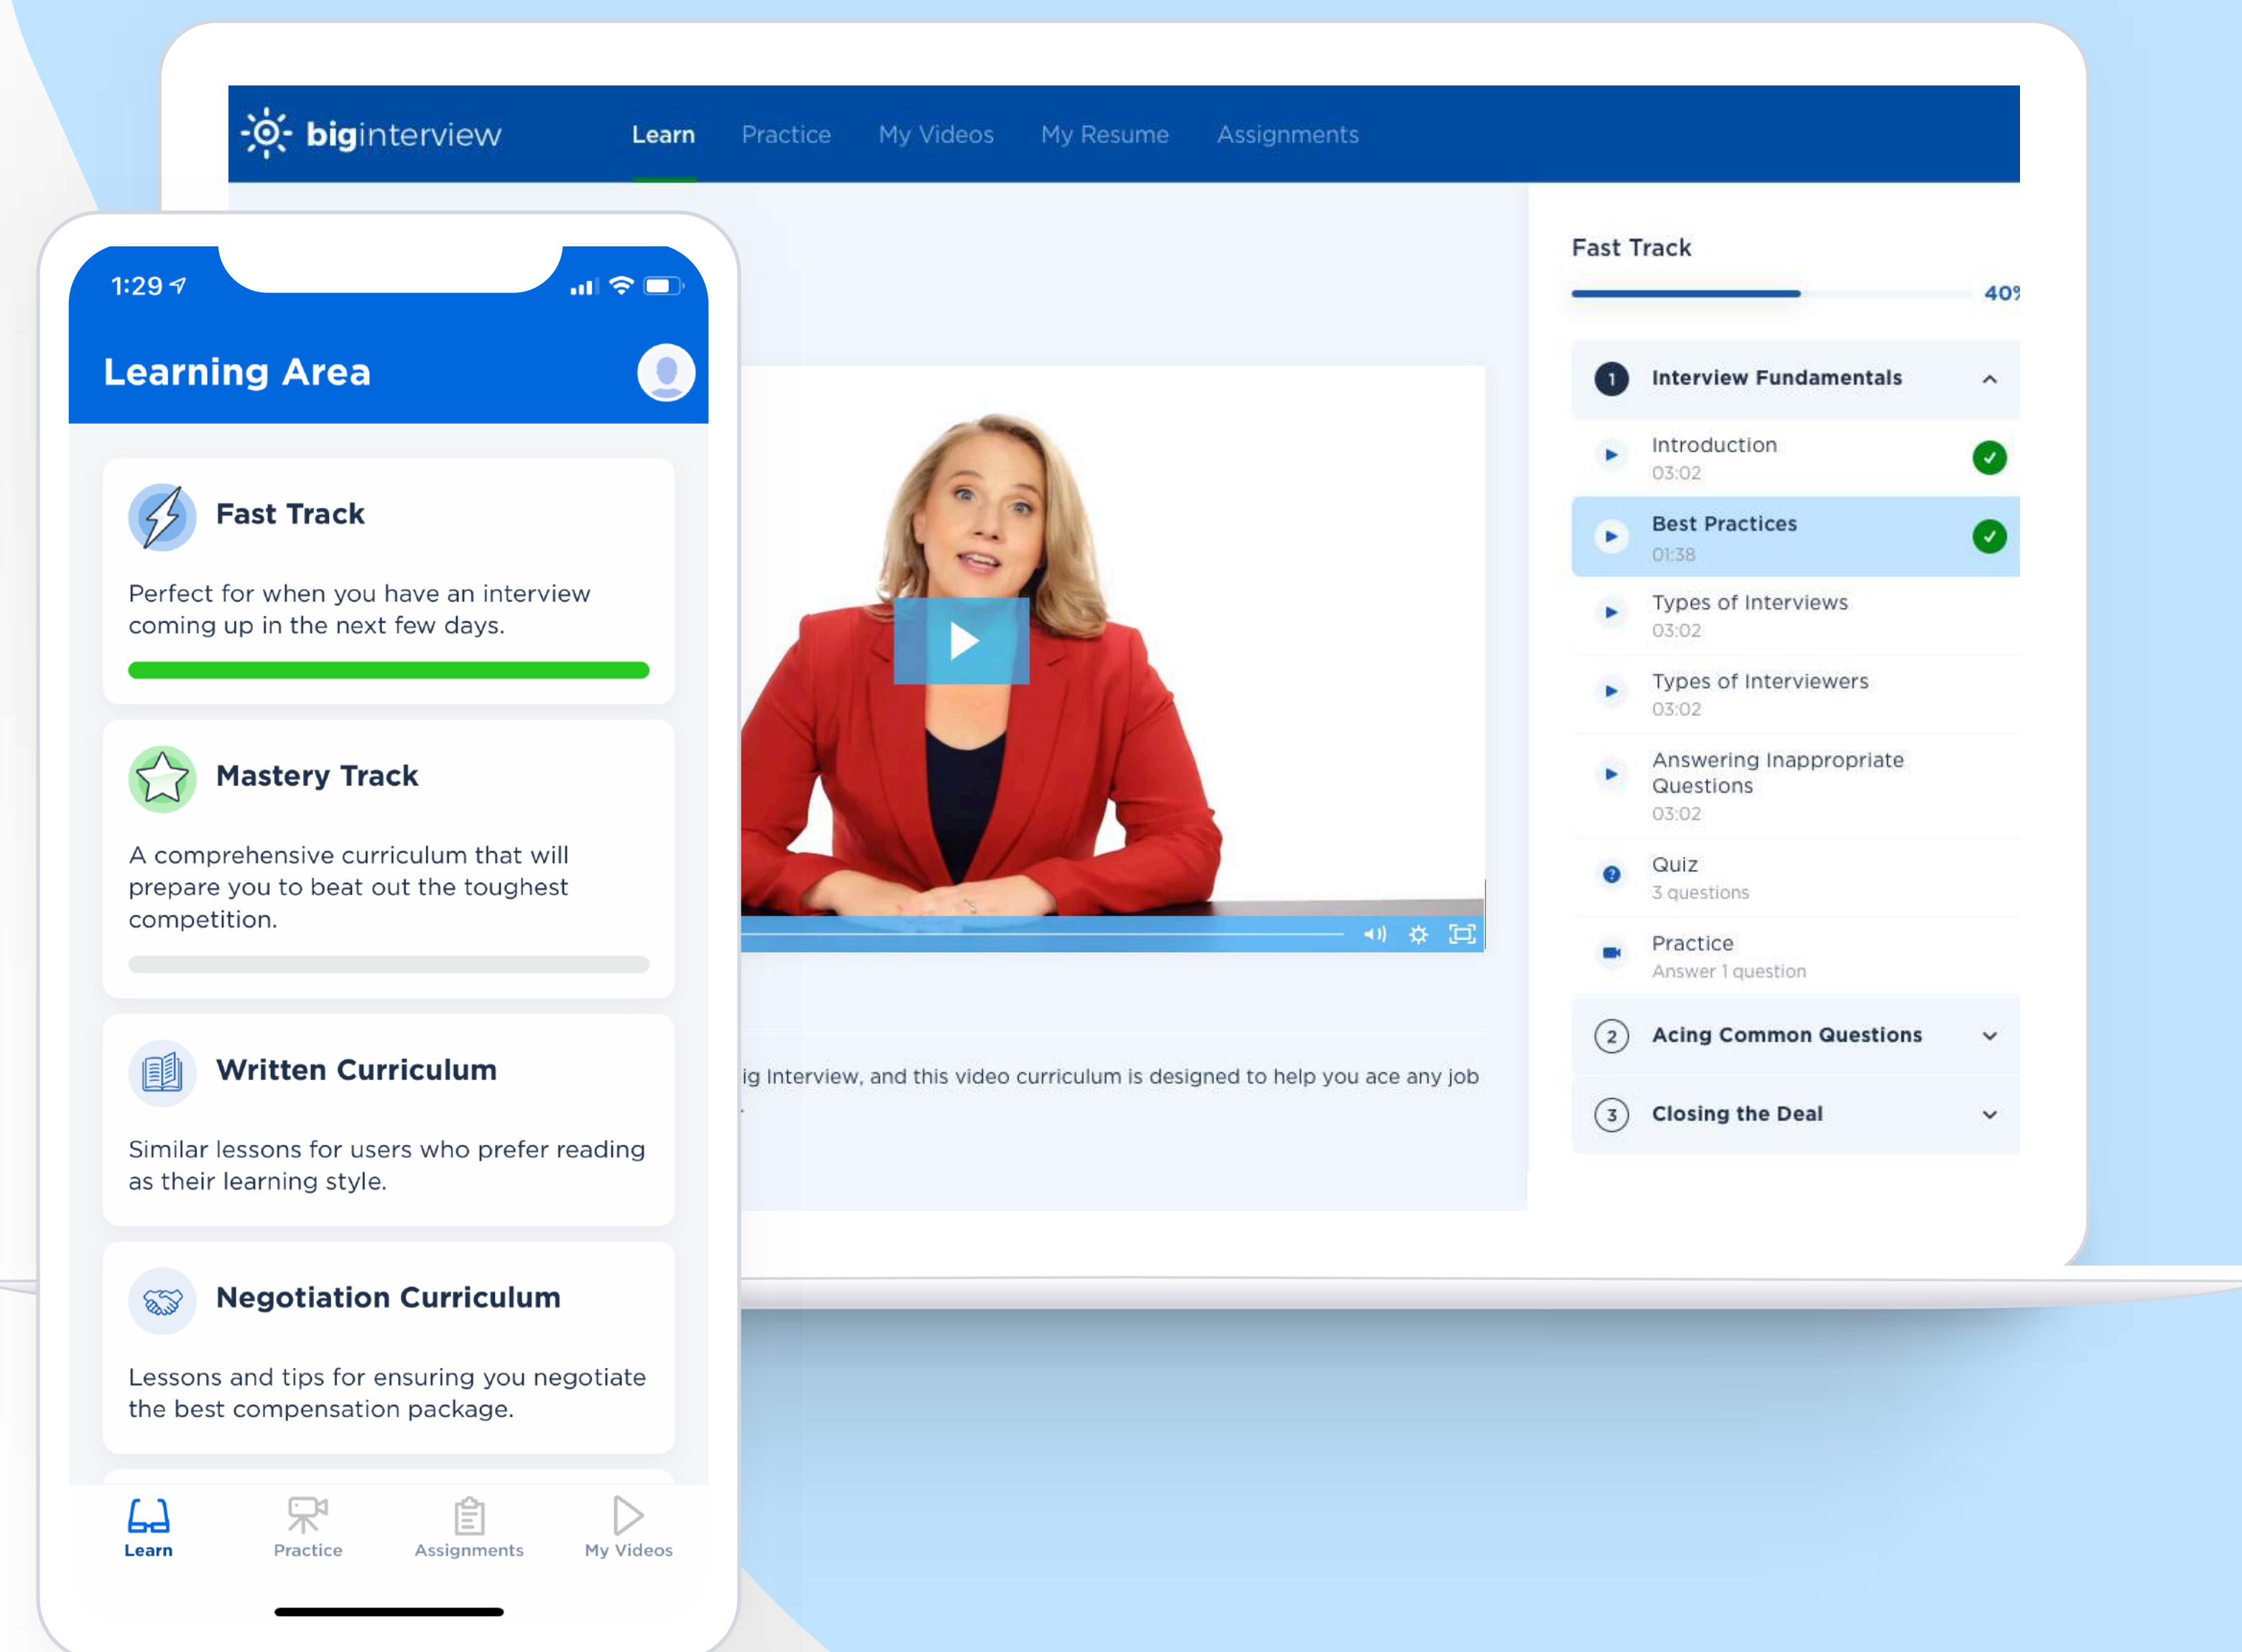

I used the military specific interview training inside Big Interview to bridge the gap between military transition programs and what employers actually need to hear.

Translating my skills was much easier once I understood what was expected of me in the civilian workforce. After using your training system, I got a job as a consultant for a non-profit that works with active and former military. I love it! It's been a huge turning point in my life! THANK YOU!

Ernesto

Military/Consulting
